Patrizio Lancellotti

**MICS 2020** is a two-day symposium focused specifically on the newest issues of minimally and ultra-minimally invasive and robotic mitral, tricuspid, atrial fibrillation surgery and less conventional catheter based mitral procedures.

This Conference is organized by the Mitral Academy, a cultural association whose goals include a common work platform dedicated to the progress gained in the medical-scientific field by mitral valve surgery.

**MICS 2020** is addressed for cardiac surgeons, interventional and non-interventional cardiologists, anesthesiologists and perfusionists involved in minimally invasive mitral valve surgery, ranging from basic diagnosis to advanced treatment.

World Opinion Leaders within this subject have been invited as Faculty to share their experience with the audience.

## HIGHLIGHTS

- Basic Sciences
- Transcatheter mitral therapies
- Tricuspid valve regurgitation
- Transcatheter tricuspid therapies
- Tricuspid valve surgery
- Advanced and unconventional mitral repair Ultra minimally and robotic mitral surgery Apical approach
- Valve in valve procedures
- New technologies
- AF surgical and non surgical treatment
- Left appendage occlusion, device and strategy  
Minimally invasive arena video session

### CONFERENCE VENUE

**Pontificia Università Urbaniana**

Via Urbano VIII, 16  
00120 Rome - Italy

### CME ACCREDITATION

Italian CME accreditation  
will be provided

### CME PROVIDER

**GVM Campus**

(Provider n. 6028)

### ORGANIZING SECRETARIAT

**MICS 2020** is promoted  
by Mitral Academy

*For information regarding  
scientific programme, registration,  
hotel accommodation, etc.,  
please contact the Organizing  
Secretariat*
